

HIREN VARGIYA

(+91) 8141375970 | hrvargiya.edu.124@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Ahmedabad, Gujarat, India

TECHNICAL SKILLS

Languages: C, C++, Python (Pandas, NumPy), JavaScript, Java (Basics)

Frontend: React.js, React Native (Expo & CLI)

Backend: Flask, REST APIs, PHP

Databases: MySQL, PostgreSQL, Firebase, Supabase

Cloud & Tools: Google Cloud Platform, Firebase Auth, Cloudinary, Git, GitHub, Linux

AI/ML: Google Cloud Vision OCR, Computer Vision, Machine Learning

PROJECTS

Wildlife Animal Intrusion Detection System — YOLO11m, Python, HTML-CSS, IoT

- Collaborating with the Gujarat Forest Department for deployment in the Gir National Park region — addressing real incidents like the one-year-old lion cub killed on Bhavnagar–Somnath National Highway at night on high-risk corridors like Amreli–Rajula and Mendarda–Sasan.
- Implemented a YOLO11m-based custom object detection model to identify lions and leopards from live roadside CCTV feeds in both RGB and night vision, trained on domain-specific datasets for accuracy in low-light, forest, and unseen environments.
- Deployed model on checkpost server with multi-video stream processing for simultaneous camera monitoring — integrated a silent light-signal siren system triggering instant notifications to Ranger Officers, RFOs, and checkpost staff upon detection

Automated Document Verification – ACPC — Python, Google Cloud Vision OCR, YOLO, Flask

- Thousands of admission documents were manually verified — engineered an AI-driven system to automate verification of government-issued student documents (Income, EWS, SEBC, NCL, SC, ST) at scale.
- Implemented YOLO-based stamp & signature detection integrated with OCR for structured data extraction, with multilingual (Gujarati + English) normalization for diverse document formats.
- Built a field-wise validation dashboard giving admission staff real-time visibility into document status — replacing a process that was previously impossible to do consistently under admission deadlines.

LDCE Academic System (LAS) — React.js, Node.js, Express.js, React Native, PostgreSQL

- Departments managed attendance, assessments, and CO-PO mapping through fragmented manual processes — built a centralized platform eliminating data duplication and compilation errors across web and mobile
- Automated CO-PO attainment calculation and analytics dashboards so faculty can monitor student performance in real time instead of generating reports manually before NBA accreditation visits.
- Implemented role-based access control for faculty, HoD, and admins with a structured PostgreSQL schema linking courses, assessments, and outcomes in one unified system.

fixItNow – Citizen Issue Resolver — HTML, CSS, JavaScript, Firebase, Cloudinary

- Citizens had no reliable channel to report and follow up on local civic issues — built a real-time platform where complaints are submitted, tracked, and updated live using Firestore without any page reload.
- Unauthenticated open platforms attract fake or duplicate reports — integrated Firebase Auth to ensure only verified users can submit issues, improving the quality and credibility of reported data.
- Large image uploads were a bottleneck for civic apps on low-bandwidth connections — offloaded media handling to Cloudinary CDN for optimized storage and faster delivery.

StackIt – Q&A Forum — HTML, CSS, JavaScript, PHP, MySQL

- Developer communities lacked a focused, distraction-free space for structured technical Q&A — built a lightweight forum with threaded responses keeping discussions organized and easy to follow.
- Unprotected platforms invite spam and misuse — implemented secure login with password hashing and session-based authentication to maintain a trusted community environment.
- Unstructured data makes finding answers slow — designed a normalized MySQL schema cleanly separating users, questions, answers, and nested comments for efficient querying and display.

EDUCATION

B. E. Information Technology L.D. College of Engineering, Ahmedabad	CGPA: 8.13 2023 – Present
H. S. C. (Science) Sigma Public School	77.60% 2023
S.S. C. Shree Swaminarayan High School	82.16% 2021

CERTIFICATIONS & LEADERSHIPS

Google Cloud Arcade Facilitator Program – Cohort 2 (2025) | Google Cloud

Training & Placement Coordinator - T&P Cell, LDCE

Campus Lead - Open Source Connect India
